Journal of Science Education and Technology

Vol. 14, No. 1 **March 2005**

CONTENTS

Some Remarks on the Improvement of Engineering Education 1
Myron Tribus

A Review of Solution Chemistry Studies: Insights into Students' Conceptions 29
Muammer Çalýk, Alipaşa Ayas, and Jazlin V. Ebenezer

The Effect of Instructional Modality and Prior Knowledge on Learning Point Group Symmetry 51
Katharyn E. K. Nottis and Margaret E. Kastner

Teaching Partnerships: Early Childhood and Engineering Students Teaching Math and Science Through Robotics 59
Marina U. Bers and Merredith Portsmore

Energy, Society, and Education, with Emphasis on Educational Technology Policy for K-12 75
Loutfallah Georges Chedid

Engaging Inner City Students in Learning Through Designing Remote Operated Vehicles 87
Michael Barnett

An Investigation of Factors Affecting the Degree of Naïve Impetus Theory Application 101
Xiufeng Liu and Dan MacIsaac

Computers With Wings: Flight Simulation and Personalized Landscapes 117
Stefano Oss

Digital Learning Material for Model Building in Molecular Biology 123
Tinri Aegerter-Wilmsen, Fred Janssen, Rob Hartog, and Ton Bisseling

The Laser Academy: An After-School Program to Promote Interest in Technology Careers 135
Amy E. Bieber, Paul Marchese, and Don Engelberg

Journal of Science Education and Technology

Vol. 14, No. 2 **June 2005**

CONTENTS

Science Education in Review: Response to the Secretary's Summit of 2004 143
David D. Kumar and Kent J. Crippen

NASA Education: Using Inquiry in the Classroom So that Students See Learning in a Whole New Light 147
Adena Williams Loston, Peggy L. Steffen, and Steven McGee

Needed: Reincarnation of National Defense Education Act of 1958 157
Mary M. Harris and James R. Miller

Becoming a Learning Organization: New Directions in Science Education Research at the National Science Foundation 173
Judith A. Ramaley, Barbara M. Olds, and Janice Earle

Enhancing Teacher Preparation and Improving Faculty Teaching Skills: Lessons Learned from Implementing "Science That Matters" a Standards Based Interdisciplinary Science Course Sequence 191
Robert Potter and Gerry Meisels

Secondary Education Systemic Issues: Addressing Possible Contributors to a Leak in the Science Education Pipeline and Potential Solutions 205
Hollie Young

Cognitive Research and Elementary Science Instruction: From the Laboratory, to the Classroom, and Back 217
David Klahr and Junlei Li

Developing a Research Agenda in Science Education 239
Patricia E. Simmons, Herb Brunkhorst, Vincent Lunetta, John Penick, Jodi Peterson, Barbara Pietrucha, and John Staver

The Impending Revolution in Undergraduate Science Education 253
Robert L. DeHaan

Journal of Science Education and Technology

Vol. 14, No. 3 **September 2005**

CONTENTS

Constrained Subjective Assessment of Student Learning 271
Sokol Saliun

Using Palm Technology in Participatory Simulations of Complex Systems: A New Take on Ubiquitous and Accessible Mobile Computing 285
Eric Klopfer, Susan Yoon, and Judy Perry

Extraordinary Animals and Expository Writing: Zoo in the Classroom 299
Guy Trainin, Kathleen Wilson, Mimi Wickless, and David Brooks

The Interface Design and the Usability Testing of a Fossilization Web-Based Learning Environment 305
Shiang-Kwei Wang and Chiachi Yang

Should Science be Taught in Early Childhood? 315
Haim Eshach, and Michael N. Fried

The Gateway Science Workshop Program: Enhancing Student Performance and Retention in the Sciences Through Peer-Facilitated Discussion 337
Denise Drane, H. David Smith, Greg Light, Larry Pinto, and Su Swarat

Visual Representations of DNA Replication: Middle Grades Students' Perceptions and Interpretations 353
Michelle D. Patrick, Glenda Carter, and Eric N. Wiebe

Journal of Science Education and Technology

Vol. 14, No. 4 **December 2005**

CONTENTS

The 2005 Paul F-Brandwein Lecture: Is Our Past Our Future? Thoughts on the Next 50 Years of Science Education Reform in the Light of Judgments on the Past 50 Years 367
F. James Rutherford

Predicting Scientific Understanding of Prospective Elementary Teachers: Role of Gender, Education Level, Courses in Science, and Attitudes Toward Science and Mathematics 387
David D. Kumar and John D. Morris

Implementation of Large-Scale Science Curricula: A Study in Seven European Countries 393
G. M. Pilling and D. J. Waddington

Partners in Science: A Model Cooperative Program Introducing High School Teachers and Students to Leading-Edge Pharmaceutical Science 409
Joseph R. Woska, Jr., Danielle M. Collins, Brian J. Canney, Erin L. Arcario, and Patricia L. Reilly

Effects of Integrating Hypermedia into Elementary Science Professional Development on Science Content Knowledge 415
Richard Hartshorne

Meeting the Demands of the Workplace: Science Students and Written Skills 425
F. Elizabeth Gray, Lisa Emerson, and Bruce MacKay

Journal of Science Education and Technology

Vol. 14, Nos. 5/6 **December 2005**

CONTENTS

Awareness of Societal Issues Among High School Biology Teachers Teaching Genetics 437
Ilit Block and Reuven Lazarowitz

Emerging Conceptual Understanding of Complex Astronomical Phenomena by Using a Virtual Solar System 459
Elchanan Gazit, Yoav Yair, and David Chen

The Effects of a Kit-Based Science Curriculum and Intensive Science Professional Development on Elementary Student Science Achievement 471
Betty J. Young and Sharon K. Lee

How Does Identity Shape the Experiences of Women of Color Engineering Students? 483
Erika D. Tate and Marcia C. Linn

Design and Evaluation of Digital Learning Material to Support Acquisition of Quantitative Problem-Solving Skills Within Food Chemistry 495
Julia Diederen, Harry Gruppen, Rob Hartog, and Alphons G. J. Voragen

Eye-Tracking Students' Attention to PowerPoint Photographs in a Science Education Setting 509
David A. Slykhuis, Eric N. Wiebe, and Len A. Annetta

The Pedometer as a Tool to Enrich Science Learning in a Public Health Context 521
James A. Rye, Samuel J. Zizzi, Elizabeth A. Vitullo, and Nancy O'Hara Tompkins
